Summary

Full Stack Web Developer with a background in HVAC and Customer Service, looking to improve user experience on the web. Detail oriented, data driven, and soon to earn a certificate in full stack development from the University of Washington. I worked in a team of 4 to develop a node.js application that allows a user to save all their hobbies to their account and view all other users and their hobbies.

Technical Skills

Languages: HTML, CSS, JavaScript, Node JS, MongoDB, mongoose

Applications: MySQL, Express, Sequelize, Bootstrap

Projects

HobbyHub

<https://github.com/Billygm/HobbyHub> | <https://hobbyhub10.herokuapp.com/>

- HobbyHub is a web application that provides users with the ability to log and share similar extracurricular interests.
- I focused on getting the routes and controllers working for this project.
- JavaScript, CSS, Handlebars, express, Sequelize, MySQL, Bootstrap, node.js

Sweata-Weatha

<https://github.com/Billygm/sweata-weatha> | <https://billygm.github.io/sweata-weatha/>

- A fun app that allows users to search for a city and displays a gif based on the current weather conditions.
- I worked on the JavaScript for this project
- JavaScript, CSS, HTML, Giphy API, Weather-Ninja API

Weather-Dashboard

<https://github.com/Billygm/Weather-Dashboard>

<https://billygm.github.io/Weather-Dashboard/>

- A 5-day weather app with access to multiple cities. type a city name and see the weather data for that city.
- Solo Project
- JavaScript, HTML, Bootstrap

Experience
